

Potential Behavioural Interview Questions - AI Solutions Development

1a. Tell us about yourself (should be brief, purposeful, and relevant to the job) – your education, employment history, and highlights of your experience as it relates to the job. (The interview will be based on the job description you submitted with your Cover Letter and Resume assignment)

b. Why did you choose your program? At what point did you make this decision? Specifically, what attracts you to this industry as a career? And why do you believe you would be a good fit within (the company you submitted the job description for).

Teamwork and Conflict

2. Can you give an example of when you had to deal with a conflict, be it with a co-worker, superior or customer, how you dealt with it and what was the outcome?

3. Describe a situation in which you had to arrive at a compromise or guide others to a compromise.

Listening and Customer Engagement

4. Tell of a time when your active listening skills really paid off for you – maybe a time when other people missed the key idea being expressed. Initiative

5. Describe some projects or ideas (not necessarily your own) that were implemented or carried out successfully primarily because of your efforts.

Potential Technical Interview Questions - AI Solutions Development

1) How do you approach identifying and solving business problems using machine learning?

2) Can you discuss a time when you had to optimize a machine learning algorithm or model for performance?

3) How do you stay updated with advancements in machine learning and AI technologies?

4) Can you provide an example of a project where you collaborated with a team to develop and deploy a machine learning-based product?

5) Describe a situation where you had to communicate complex technical concepts to a non-technical audience.
