COLLABORATION USING TABLEAU – OFFLINE

COLLABORATION USING TABLEAU – OFFLINE –

1. **Create** a group Tableau Workbook named **Group#_Main.twbx**
2. **Extract** data. On the Data Source tab select Extract option (extract all)
3. **Save** the file as Tableau Packaged Workbook (.twbx)
4. **Distribute** the tableau packaged workbook among all team members.
5. **.twbx** -> coordinator must save the file as .twbx
6. **.twb** -> team must save the file as .twb and **submit** to the coordinator the tableau files .twb
7. **Consolidation** -> on Group#_Main.twbx the coordinator will open a **new tab**. Then...
 - **Import Workbook.** Go to File > import the tableau file .twb one at a time (repeat 9-10 as needed)
 - **Verify** all the tabs, parameters, and calculated fields are with no errors.
 - **Refresh** data extract.
 - **Save** the new file again as .twbx
 - **Distribute** this file again to all group members
8. **Repeat** this for each exercise and project
