

SCHOOL OF COMPUTER TECHNOLOGY

AASD 4007
Design Thinking for A.I. Solutions
Session 2

Reza Moslemi, Ph.D., P.Eng.

Session 2

- A1: Problem spaces and stakeholders (In-class)
- Exercise: Interview practice and expert Interviews
- A2: Interview questions & database ideas (Homework)

Assignment 1: In-class

Problem space & stakeholders

Assignment 1: In-class

A1 – Common Pitfalls

- Not including enough supporting evidence in your problem description
- Not selecting and/or clearly stating a target user audience
 - Your target audience cannot be all your stakeholders

It is also important to also consider why existing solutions have not been able to solve your problem!

Exercise: Interview practice and expert Interviews

Mode: in group

Problem space: Environmental Sustainability & Green Technology as per Assignment 1

Submission: None

In Preparation for EXPERT Interview:

- 1- Read the two articles provided in Assignment 2
- 2- Work in pairs and practice Researcher & Participant roles
- 3- Demo your Research/Interview questions in class

Assignment 2: Homework

Interview questions & database ideas
