

Individual Exercise

Applied Data Management Governed Framework to a Student Registration Process

1. Process/Data Flow Diagram (P/DFD): Develop the diagram indicating the flow of data among the main processes to successfully complete the registration. Show process ownerships and orchestration.

2. Entity-Relationship Diagram (ERD): Develop the Entity Relationship Diagram (ERD) for this project

- Indicate entities, attributes, relationships, primary key and foreign key(s)
- Indicate Master Data, Reference Data and Metadata tables
- Indicate cardinality. Use standard crowfoot notation.
- Solve many-to-many relationships. ERD must be in 2/3NF

Activities to consider:

- + Student Management
- + Registration Management
- + Program/Courses Management
- + Faculty Management
- + Classroom Location

Use Lucidchart or Draw.io Only

Save, export and submit the D/PFD and ERD as PDF(s)

Submit: **1 - P/DFD**
 2 - ERD
