DATA PRIVACY

The DAMA Wheel

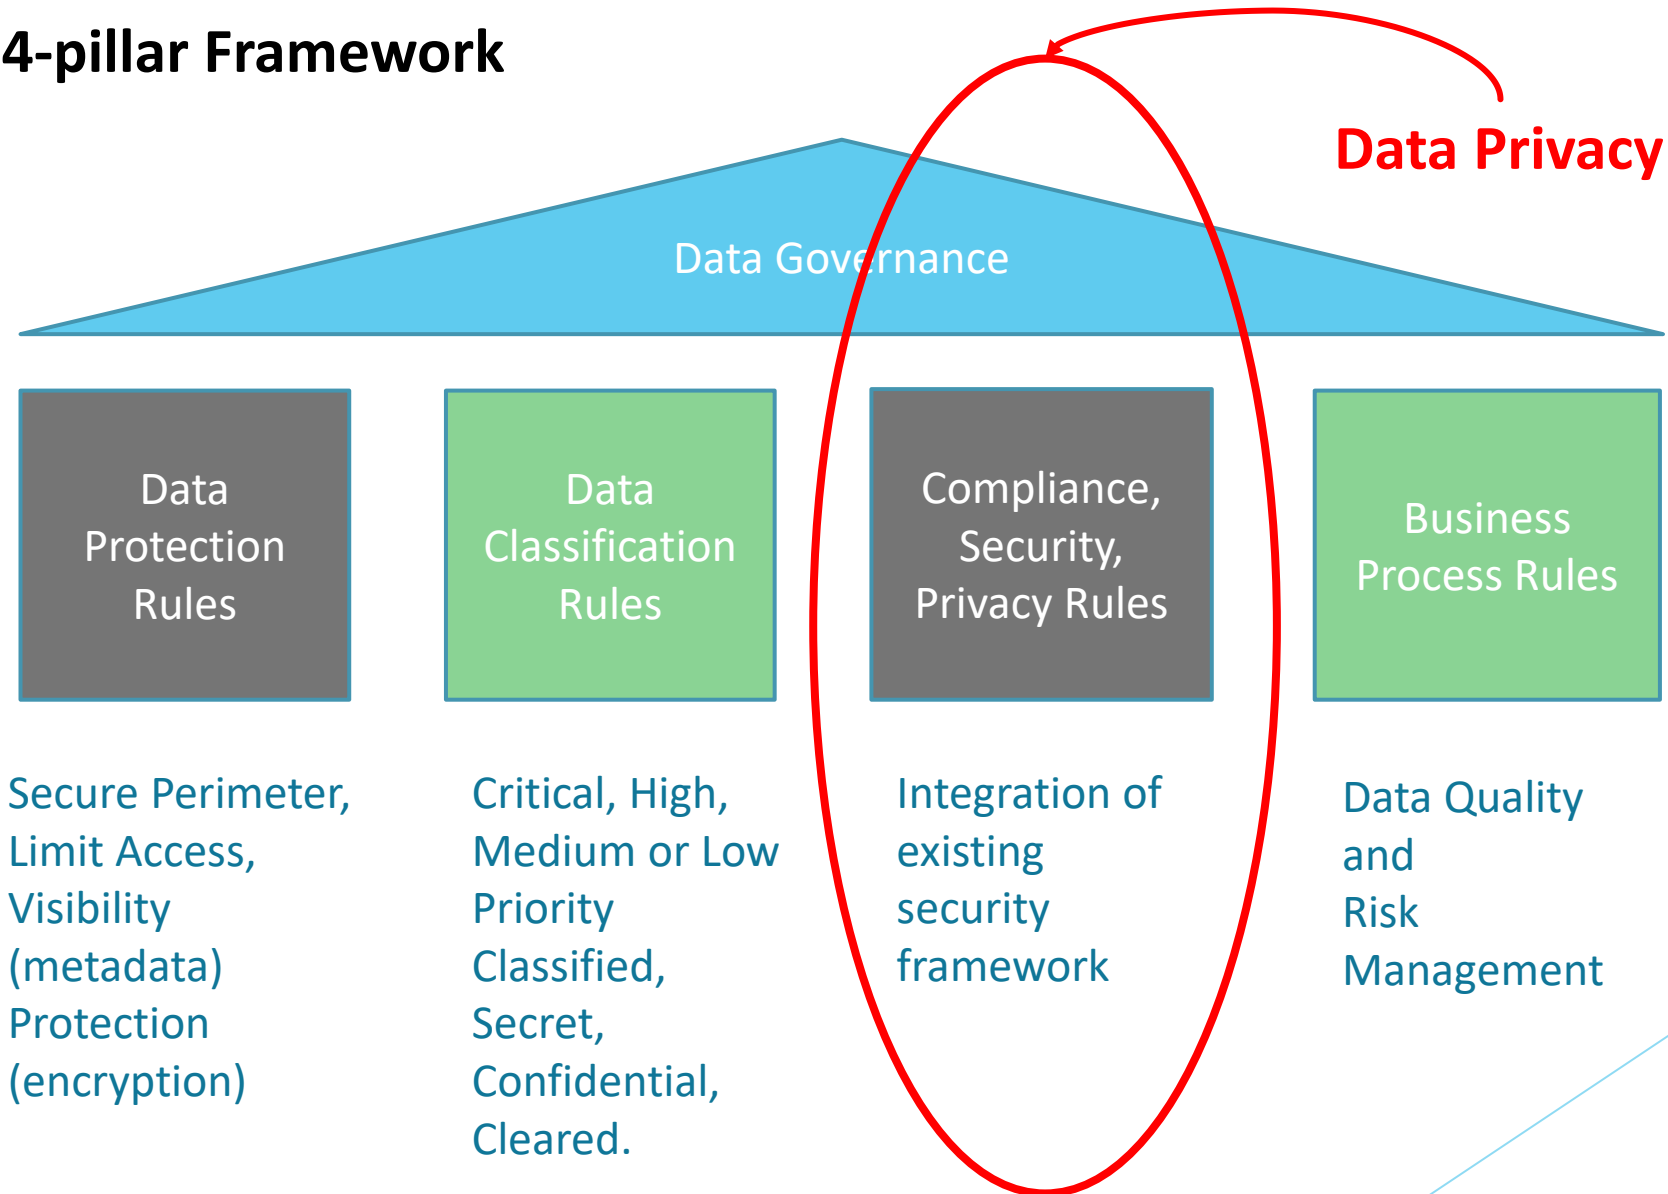

© MARK ANDERSON

WWW.ANDERTOONS.COM

"Before I write my name on the board, I'll need to know how you're planning to use that data."

DG 4-pillar Framework

INTRODUCTION

- The police apprehends a traveler because of tweets
- A university researcher demonstrates how mobile phones become tracking devices
- Metadata has a different meaning (and purpose) to service providers, general public and government authorities
- Laws and regulations define privacy policies intended to protect the data of individual, enterprise, government from being used without formal owners' consent

Data Privacy Framework

Definition

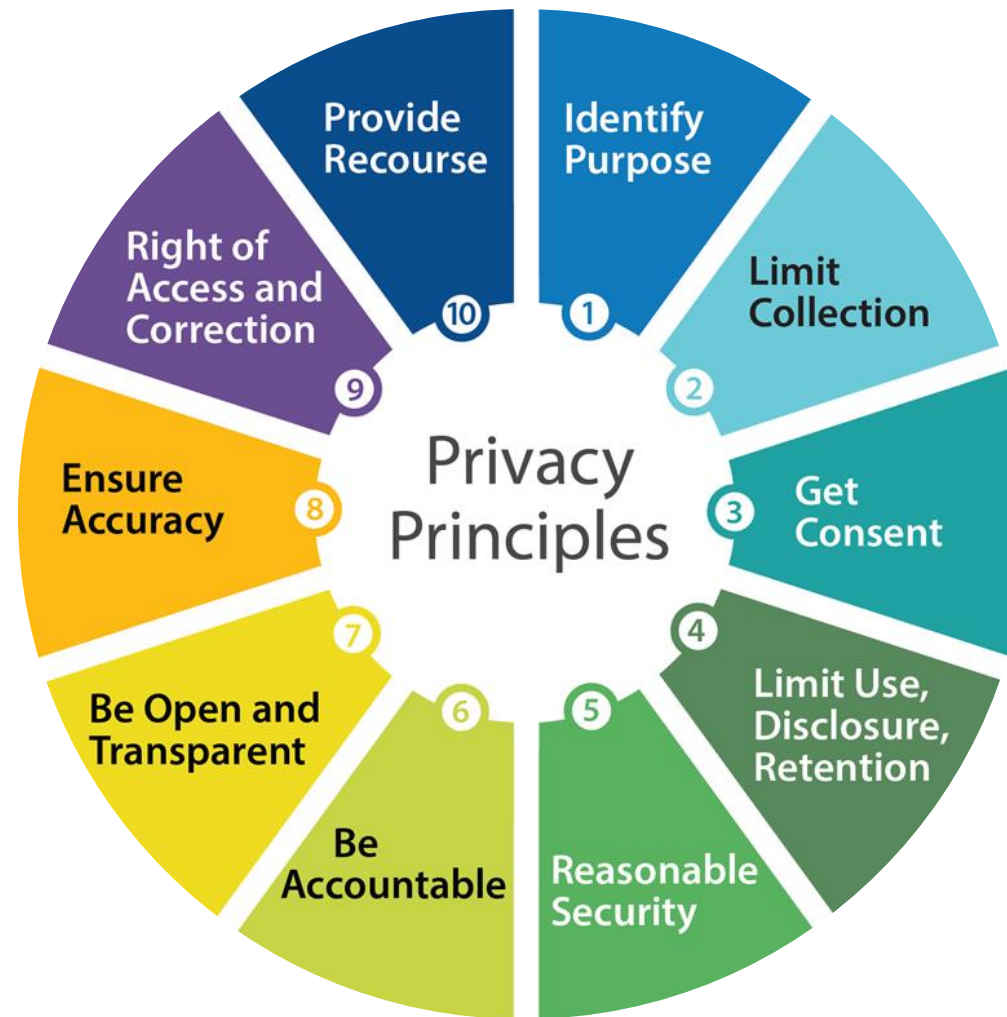

The exercise of monitoring, and enforcement, and shared decision-making over Privacy of Data

Drivers

- Increase customer satisfaction and reduce complaints related to data privacy
- Regulatory compliance
- Reduce the risk
- Improve Data Quality
- Improve Metadata management
- Increase individuals' satisfaction (internal and external)

Principles

- Be Accountable. Be responsible, by contractual or other means, for all personal information under your control
- Ten Principles of Privacy Protection - Province of British Columbia (gov.bc.ca)

Goals^{1,2}

1. Identify and flag sensitive data within the metadata repository
2. Address privacy laws and restrictions by country, state or province
3. Monitor access to sensitive data by privileged users

Business Drivers

Inputs

- Laws, regulatory requirements
- industry standards
- Principles, policies, on data lifecycle
- Data Maturity Assessment
- IT Practices and Technology

Activities

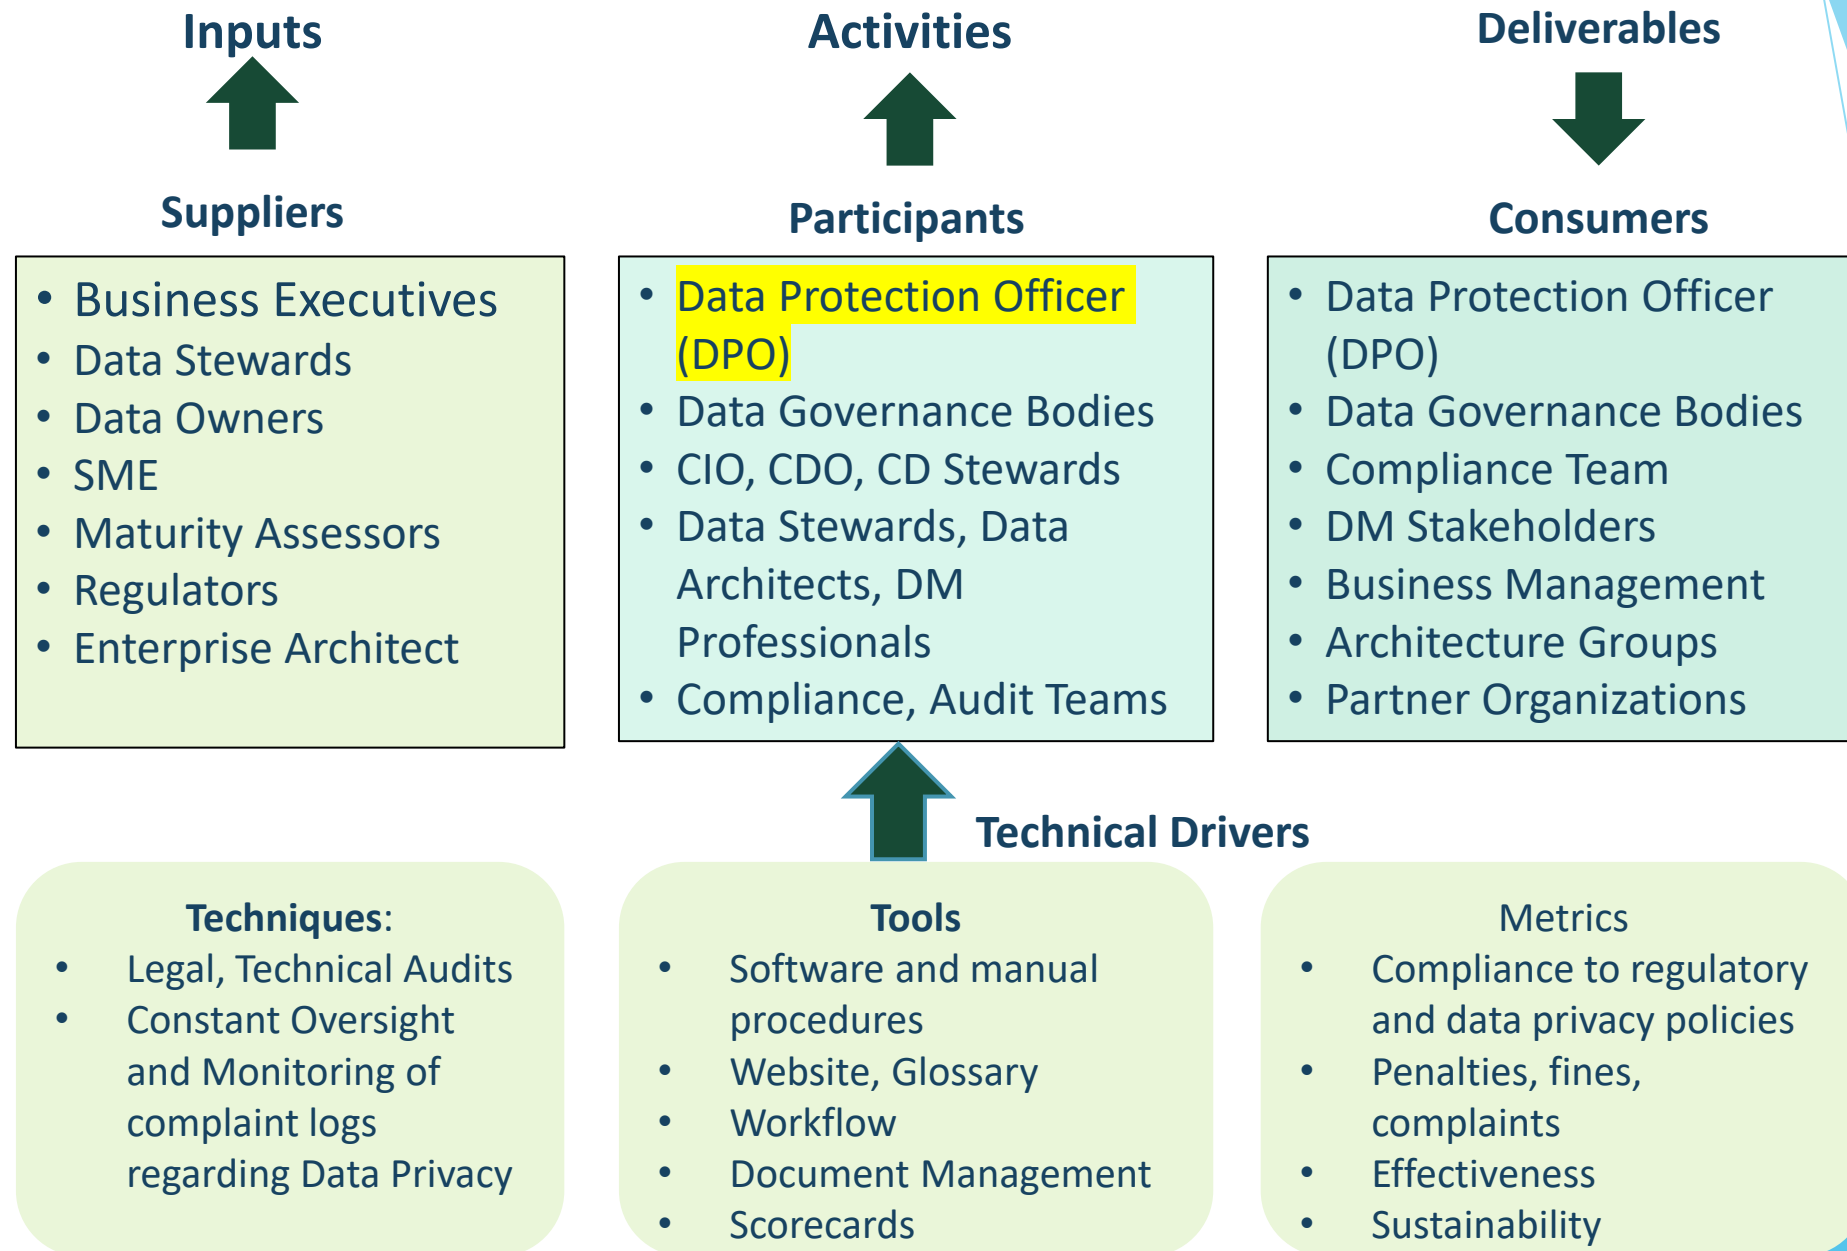

- Plan for compliancy
- Create Data Privacy Policies
- Define Data Privacy Team
- Oversight Data Lifecycle
- Audit Data Storages, DW, and Metadata
- Publish and Deliver Data Privacy Policies and Procedures

Deliverables

- Data Privacy Strategy, Principles, Policies, Procedures
- Recognized Compliance
- Data Privacy KPIs

Essential Concepts

1. **Identify sensitive data**
 - De-identification of Data
 - Do not attempt to re-identify the data
 - Require downstream user to keep the data in de-identification form
2. **Flag sensitive data** within the metadata repository
3. **Address privacy laws** and restrictions by country, state or province
 - Privacy by design
 - Reasonable limitations on data collection
 - Reasonable data retention and disposal policies
 - Simplified consumer choice to obtain express consent of data usage
 - Data brokers
 - Large platform providers

2. ACTIVITIES

1. Define Data Privacy for the Organization
2. Perform Readiness Assessment
3. Perform **Discovery** and Business Alignment
4. Develop Data Privacy **Strategy** aligned to the Data Governance Strategy
5. Define Data Privacy Goals, Principles, and Policies

7. Define DP Operating Framework

3. TOOLS and TECHNIQUES

- Online Presence / Websites
- Business Glossary
- Workflow Tools
- Document Management Tools
- Data Privacy Scorecards

5. Metrics

a. Value

- Conformance to regulatory requirements
- Reduction of risk
- Reduction of penalties and fines
- Contribution to business objectives

b. Effectiveness

- Speed of change adoption
- Achievement of Data Privacy goals and objective
- Effectiveness of communication
- Effectiveness of education / training

c. Sustainability

- Performance of policies and process
- Conformance to regulatory requirements
