Smart mobile devices face challenges in managing storage consumption due to the increasing size and number of apps, media files, and other data

In 2010 16GB was often enough for casual users, but now 128GB or 256GB are popular and necessary choices

The average smartphone offered nearly 100GB storage in 2020

Reference Link: <https://www.androidauthority.com/average-smartphone-storage-1213428/>

Why? Media Files: Photos and Videos with high-resolution consume a large amount of storage

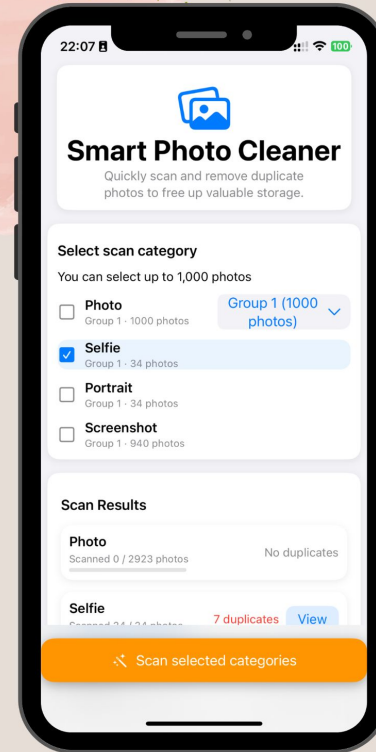

Many people find that their phone storage is mostly taken up by photos. This is especially true because modern phones take high-resolution pictures and support burst mode. With burst shots, users often take many similar or duplicate photos at once, which makes organizing them difficult. As a result, these large photo libraries end up using a lot of valuable storage space.

Opportunity

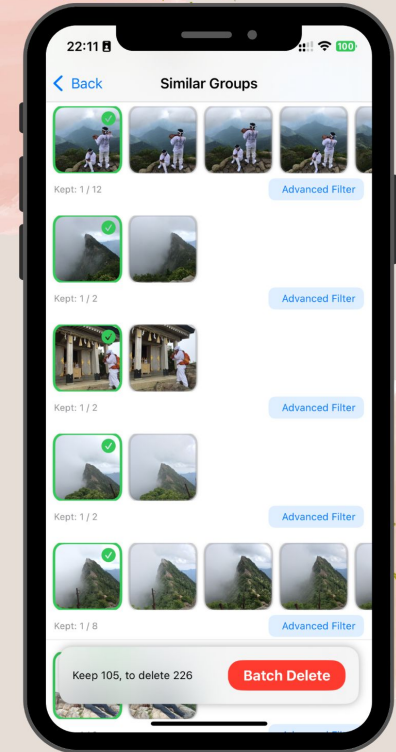

Smart AI Photo Cleaner

- Most users take a lot of similar photos using burst mode or multiple shots.
- Organizing and deleting them manually is time-consuming and frustrating.
- High-resolution media quickly fills up storage space, especially on 64GB or 128GB devices.
- Users need a fast and easy way to clean up duplicate or similar photos.
- There is growing demand for storage-saving apps that work with just one tap.

SMART PHOTO
CLEANER
FREE UP SPACE
INSTANTLY!

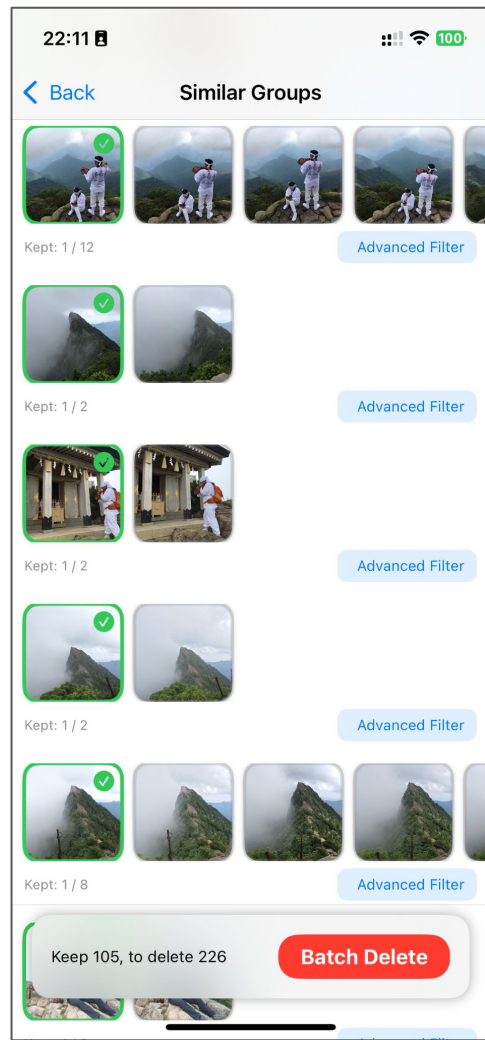

PRIVATE & SECURE
PHOTO CLEANUP
FREE UP STORAGE
ALL ON YOUR DEVICE

Proposed Solution

- **Solution: Smart Photo Cleaner App**
 - Uses AI to detect and group similar photos, helping users delete duplicates and free up space effortlessly.
- **Key Technology:**
 - Photo Embedding with Core ML ResNet-50
 - Powered by apple/coreml-resnet-50 (MIT License, commercial-use allowed)
 - Image Similarity Detection
 - Embedded photo vectors are compared using cosine similarity to find duplicates.
 - Smart Grouping & Swipe UI
 - Detected duplicates are grouped visually. Users can quickly “keep” or “delete” via swipe gestures or batch actions.
- **Result:**
 - A fast, intuitive, and intelligent solution that helps users reclaim storage in seconds — with no technical knowledge needed.

Strategic fit and competitive advantage

Unlike other apps that process photos in the cloud and may raise privacy concerns

Smart AI Photo Cleaner processes everything locally on your device! So your photos never leave your phone and totally free!!!

Cost

Smart AI Photo Cleaner \$0.0

Remove duplicate photos

Function

Cleanup: Phone Storage Cleaner Ad

Photo Clean, Delete Duplicates
Codeway Dijital Hizmetler Anonim Şirketi
#4 in Utilities
★★★★★ 4.7 • 453.1K Ratings
Free • Offers In-App Purchases

Cleaner AI: Photo Cleanup Ad

Clean & Optimize Phone Storage
Codespace Dijital Hizmetler Anonim Şirketi
#38 in Utilities
★★★★★ 4.6 • 32.1K Ratings
Free • Offers In-App Purchases

Cleaner AI Premium Lifetime \$39.99

All-in-one app removing duplicates photo, merging contacts, compressing videos, delete emails, and protecting private files.

Cleanup Pro 1 Year \$29.99

Remove duplicate photos, videos, and junk emails. Merge duplicate contacts, compress videos, and organize storage

Business and financial impact

- Fast Development:
 - The app was developed and launched in just 4 full working days
- Low Cost, High Efficiency:
 - Built with minimal resources using [Apple CoreML with MIT License](#) and on-device processing
 - Very low running cost!
- Revenue Projections:
 - With around 5,000 active users, expected monthly Google Ads revenue is \$100+ USD
- Competitive Advantages:
 - Free APP!
 - On-device AI ensures user privacy, giving an advantage over cloud-based competitors

Key Risks and Recommendations

Risks:

- Model Accuracy: AI may sometimes group non-duplicate photos by mistake
- Device Limits: Older phones may scan slower due to limited memory and processing power

Recommendations:

- Keep improving the AI model to increase accuracy
- Optimize performance for lower-end devices
- Add Compress Videos Feature
